Objectives:

“A look at Cannabis to Manage Pain” – Patrick Mayfield, MSN, RN

1. Identify current and future qualifying diseases eligible for medical cannabis in Missouri as well as current Missouri laws, while distinguishing between plant varieties and methods of administration.
2. Demonstrate how to locate and review research evidence, and identify the benefits and risks associated with qualifying conditions including the use of medical cannabis safely.

“An Integrative and Functional Medicine Approach to Fibromyalgia” – Emily Day, MSN, FNP-C

3. Describe Integrative and Functional Medicine and its approach to chronic disease and understand approaches to fibromyalgia.
4. List 3 strategies that can be used right away for patients struggling with fibromyalgia.

“The Role of Neuromodulation in Chronic Pain Management” – Zohra Hussaini APRN, MBA

5. Explain the role of neuromodulation in chronic pain management.
6. Relate how HF10 spinal cord stimulator therapy is unique in managing chronic pain with patient outcomes noted at the University of Kansas Hospital.

“The use of BOTOX® as a Foundational Option to Treat Chronic Migraines” – Jennifer Chester, RN, MSN, FNP-BC, MSCN

7. Delineate strategies for diagnosing chronic migraine and identifying BOTOX® candidates.
8. Describe BOTOX® as foundational treatment for chronic migraine and review chronic migraine-specific PREEMPT* paradigm.
